INSIDE MINING

MEDIA KIT

miningnews.co.za

Everything and anything that you need to know about **Inside Mining** magazine – a quarterly special interest publication focusing on the state of the mining industry, leaders within the industry, developments in mining legislation, digitisation, Industry 4.0, investment and environmental issues. Find out more about our editorial features, platforms, distribution, deadlines and rates.

WHAT YOU NEED TO KNOW...

1. **Inside Mining** magazine is 1 of 6 publications owned and published by 3S Media – a content marketing and specialist media company providing targeted B2B solutions across print, digital and streaming platforms.
2. 3S Media is owned by Novus Print, a group company of **Novus Holdings** – one of Southern Africa's largest print production and manufacturing operations.
3. Our **upmarket glossy special interest publication** is aimed at identifying and providing insight into very specific topics and themes – giving you access to a wide range of experts (and decision-makers) in the mining sector.
4. We have our own **videographer**, who can shoot your video in our studio or on-site. She has a knack for reducing two-hour presentations into three-minute masterpieces.
5. Novus Holdings and its group companies are currently ranked as a **Level 2 BBBEE** Contributor at a 125% recognition level.

NOT JUST PRINT: A FULL 360° BRAND

As a media house, we know that there is only one clear way to grow and thrive in a fast-paced digital age, and that is with a multiplatform approach:

- PRINTED MAGAZINES
- DIGITAL MAGAZINES
- WEBSITE
- NEWSLETTERS
- WEBINARS
- EVENTS
- LINKEDIN
- YOUTUBE
- FACEBOOK
- TWITTER

We publish our content on different media platforms, organically maximising our reach.

Deliver your message on a platform that is optimally formatted to desktop and mobile devices. The **Inside Mining** digital magazine is available on Issuu, and is fully downloadable, shareable and hyperlinked.

Our digital magazines feature embedded videos as part of the layout. This facilitates a symbiotic relationship between print and digital.

Digital editions also overcome physical distribution challenges.

While our distribution footprint includes cross-platform duplicates, the strength of a marketing message is amplified through its engagement at multiple touch points. It ensures your marketing message reaches its target audience in their preferred media format.

WHO'S READING OUR MAGAZINE?

Our target audience are key industry influencers, decision-makers and leaders. They are relevant and engaged:

Surface Miners

- Mine Managers
- Quarry Managers
- Water Engineers
- Electrical Engineers
- Environmental Consultants
- Health & Safety Managers
- Procurement Managers
- Transport Managers
- Mine Surveyors
- Maintenance Managers

Underground Miners

- Mine Managers
- Mining Engineers
- Ventilation Engineers
- Electrical Engineers
- Greywater Managers
- Water & Sludge Engineers
- Health & Safety Managers
- Shift Bosses
- Shaft Managers
- Shaft Engineers
- Geologists
- Metallurgists
- Environmental Engineers
- Procurement Managers
- Mine Inspectors

Mining Houses

- Chief Executive Officers
- Chief Financial Officers
- Mining Engineers
- Mining Consultants
- Exploration Managers

- Consulate Generals – Embassies
- Laboratories

Mining Equipment Suppliers

Educational Institutes

The mining sector contributes 7.5% to South Africa's GDP, and directly employs more than 450 000 people. The indirect employment numbers are significantly larger and critical to the overall successful turnaround of South Africa.

Topics include sustainable development, the impact and opportunities brought by the Fourth Industrial Revolution, environmental issues, legislation, diversity and inclusion, digitisation, technology, skills development, and case studies.

INSIDE MINING MAGAZINE

ADVERTISE WITH US BECAUSE...

You have **70 335** (our total distribution footprint) reasons to advertise with us, but let's mention five:

1

COST/1 000
Our approach aims to derive **optimal value** for our advertisers' spend. Our cost/1 000 in Q2 2022 is R2 412.

2

DIGITAL
We have, through **Mining News**, a presence on **multiple platforms**: website, newsletters, social media channels and webinars.

3

COMMUNICATION SPECIALISTS
Our writers, editors and designers create highly original, **in-demand content**. Through a painless interview process, we write your stories for you.

4

VIDEO
We have our own green-screen studio, videographer, video editor and designers. **Inside Mining** can create **bespoke digital content** to support your marketing campaign.

5

CONTENT
Through a **high percentage** of well researched, relevant and **original content** in every edition, we cater to your target audience, who are our readers.

FEATURES LIST

This is the blueprint of the magazine – we cover the breadth of the entire waste management sector, as well as cleaner production.

SMART MINING (February 2023)

Mining is a multifaceted industry. The extraction of minerals and metals from the earth involves various activities and processes that ultimately lead to the success of the mining industry as we know it. The mining industry has evolved over the years to adopt and implement approaches that result in a productive, efficient, and safe mining sector. This issue of **Inside Mining** looks explores smart mining and how it impacts the mining industry.

Automation & Modernisation

Automation and modernisation have changed the historic perception of the mining industry. What was once known as an industry that relied on hard manual labour, mining today is viewed in a different light. Automation and modernisation have opened the industry up to smart innovations and technology that have positively contributed to efficiency, productivity and safety.

Smart Mining Services

Undoubtedly, mining has definitely become smarter thanks to innovative technologies and research. What is smart mining? How does impact the mining industry? Who are smart mining service providers and what do they have to offer? These and more questions are answered by the smart mining services feature.

Drilling & Blasting

Drilling and blasting are an integral part of mining. This feature unpacks the various steps involved in the drilling and blasting process. We also take a look at the different equipment and material utilised in the process.

Mine Engineering & Civil Construction

Mine engineering and civil construction are critical to any mine – be it during the development of a new mine or an expansion project on a current mine. This feature explores the role of mine engineering as well as civil construction in the context of mining.

RESOURCEFUL MINING (May 2023)

There are many resources involved in the mining process, from extracting minerals from the ground to processing them into commodities. Resources such as water and electricity are critical in the mining process; however, they are scarce in environments such as South Africa. Mine companies are well aware of the challenges regarding the availability of resources and therefore need to be resourceful within their various operations. This issue focuses on the following features:

Health & Safety Training Development

Mine companies place high standards on health and safety at their operations and continuously strive to achieve zero harm. Despite the rare incident that occurs once in a while, the mining industry has an impressive record when it comes to health and safety. Ongoing training and development around regulations as well as products and services are major contributing factors to mine health and safety. In this feature, we focus on health and safety training providers in the mining sector. We also review some products used to improve mine health and safety.

Energy

Similar to water, electricity is another important resource without which mine operations cannot survive. This feature looks at the energy resources available for mines, including coal, grid-fed energy, as well as generator-powered electricity. In addition, we look at other energy alternatives mines can rely on in their daily operations.

Pump & Valve Technologies

In a mine operation, pumps and valves can be used for various applications beyond the movement of water and other fluids. Pumps and valves need to be considered when it comes to applications such as slurry transportation, mineral processing and tailings management, among others.
This feature looks at the latest technology and innovation of pumps and valves, and how these technologies are benefitting the industry.

Transport & Logistics

Mining operates in a global landscape, meaning there is constant transportation of minerals and commodities across the world. Focusing on transport and logistics, we take a look at what it takes to successfully transport minerals and commodities from point A to B.

Additional distribution: A-OSH Expo 2023

FEATURES LIST

FOCUS IN AFRICA (August 2023)

Africa is one of the most well-endowed continents in the world. It has also become an attractive destination for potential mining investors. There are many projects in the pipeline aimed at exploring new minerals, as well as developing new mine operations. Focus in Africa looks at the following features:

African Energy

As a developing continent, Africa's energy sector has a lot of potential for growth. In addition to mineral endowment, Africa is also home to various energy sources such as oil, gas and LNG – and in most countries, the energy department falls within the mining ministry. This feature places the microscope on countries with underground energy sources, focusing on what impact these have on economic development, employment and the political landscape.

Engineering, Procurement & Construction Management

Whenever a new project is undertaken, the services of engineering, procurement and construction management (EPCM) are often required to oversee and ensure that all the work required for the project gets done adequately. This feature looks the significance of EPCMs within a project.

Materials Handling & Earthmoving Equipment

A successful mine operation depends on reliable materials handling and earthmoving equipment. This feature reviews the latest such equipment for both underground and open-pit mine operations. We also look at technological innovations that improve equipment performance.

Mineral Exploration

Africa is endowed with various mineral resources; however, many deposits have yet to be discovered and exploited. The feature looks at Africa's mineral wealth potential and how exploration can be used to capitalise on this potential.

GLOBAL FOCUS

Inside Mining is going global! Each issue will have a dedicated section for articles from around the world. This is fitting considering that the mining industry is global in its nature. Look out for exciting articles from the international mining fraternity.

SUSTAINABILITY (November 2023)

The mining industry cannot survive if sustainability is not taken into account. In addition to involving the environment, sustainable practices in the mining industry also include mine communities as well as employees. The sector has historically gained a reputation of focusing only on the bottom line and disregarding the environment, communities and employees. That has since changed, as mine companies are constantly working towards best sustainability practices to benefit everyone.

Underground Mining

South Africa is home to one of the deepest underground mines in the world. This feature looks at how underground mines have managed to survive, especially in the most difficult circumstances, such the global Covid-19 pandemic. In addition, we also look at health and safety requirements to ensure that the safety of employees working underground is not compromised.

Mining Digitisation

The mining industry has been revolutionised by technology, with digitisation taking the industry to a new level. This feature looks at how mining has benefitted from digital technologies. We also look at the impact of digital technologies on the long-term sustainability of the industry.

Legal & Finance

Operating in Africa can be complicated given the sociopolitical landscape of some African countries. This feature will look at best practice examples across Africa, with a review of cross-country application, given the impact of variable legislation, governance, tax laws and labour matters. Furthermore, the feature will also look at financing requirements for African projects.

Post-closure Rehabilitation

Post-closure rehabilitation is very important, as it ensures that the land that was previously a mine is restored to a usable state. If done properly, rehabilitated land has many uses such as agriculture, forestry and recreational activities, among others. This feature looks at the processes involved in post-closure rehabilitation as well as some case studies of post-mining land use.

ESG Warrior

The Sustainability edition of **Inside Mining** magazine is the final mining special interest publication (SIP) for the year. In this final issue, the magazine will feature selected companies operating in the mining sector and that are ESG warriors for 2022.

Additional distribution: Mining Indaba 2023

2023 CALENDAR

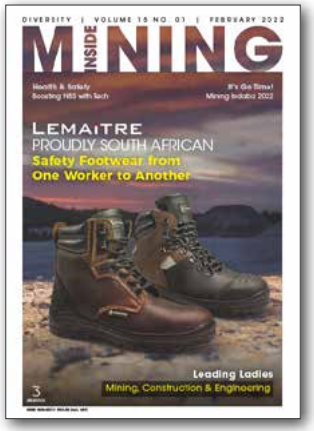

*Please note that these dates may change

While focusing on various editorial features, **Inside Mining** will:

- Examine global ideas from a local perspective
- Provide context around current events
- Demystify emerging technologies and market trends
- Break down and explain complex concepts
- Profile new mining projects
- Supply data and opinions from leaders within the industry

SPECIAL OPPORTUNITIES

Our Leadership interview sections will feature double-page interviews with respected executives in the industry, outlining personal and career journeys – especially highlighting lessons and take-aways. The editorial aspect of these main themed sections will be unsold; however, there is an opportunity for equipment and service providers in the industry to align themselves with this section by showcasing their own remarkable leaders. Please see the details below regarding partner packages and corporate profiles.

Outside Front Cover Package

This prime offering includes an interview written by our editorial team. The package consists of:

- Outside front cover image of your product or a personality from the company
- Cover line (including company name)
- A double-page editorial (with images and logo) about the company
- A featured article in the **weekly newsletter** and on the website **www.miningnews.co.za**
- A 3-minute video interview* on **www.miningnews.co.za**
- Leaderboard banner on the **weekly newsletter** for one month

CLICK HERE TO VIEW MORE EXAMPLES ONLINE

Partner Package

This prime position consists of an interview written by our editorial team. The article will be featured as:

- A one-page or two-page story up front in the magazine or associated with a specific themed section
- A featured article in the **weekly newsletter** and on the website **www.miningnews.co.za**

CLICK HERE TO VIEW MORE EXAMPLES ONLINE

Corporate Profile Package

This prime offering provides an advertiser with two or four pages to showcase their company through the use of a standard template document drafted by our production team. The content and images are supplied by the advertiser, but reworked by the publisher according to the profile template. It consists of:

- An 800-word in-depth editorial overview about the company
- Company logo, contact details, including social media handles

CLICK HERE TO VIEW MORE EXAMPLES ONLINE

Eco Warrior Package

This exclusive offering includes an interview written by our editorial team. The package consists of:

- A two-page story up front in the magazine
- A featured article in the **weekly newsletter**
- Shared on our social media platforms

3-MINUTE VIDEO INTERVIEW

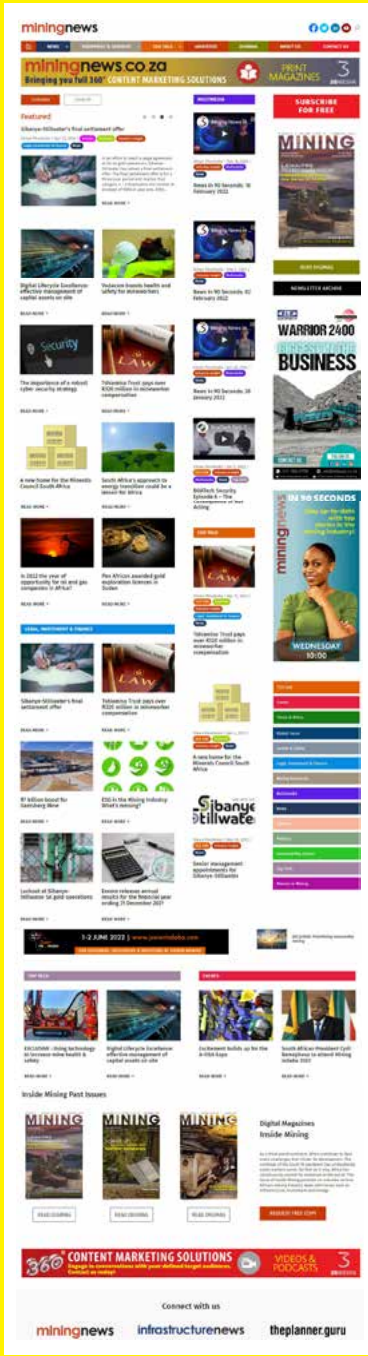

Sit-down interview at 3S Media's Studio in Johannesburg or at the client's offices, within an 80 km radius. For locations beyond 80 km, standard AA rates per km will apply. Excludes drone footage services.

ONLINE OPPORTUNITIES

Most of the traffic on **miningnews.co.za** is obtained via organic search – *Google Analytics*

miningnews.co.za is a premier source of mining content for industry professionals. The website provides local, African and global news. Our growing user base benefits from numerous daily uploads on our website and various social media platforms of international and local mining stories.

ABOUT NOVUS HOLDINGS

LEADERS IN PRINT AND MANUFACTURING

novus holdings novus print

What started as a small family-run business over a century ago is now a JSE-listed company, and one of the largest printing and manufacturing operations in Southern Africa.

Our excellent reputation has been built on an unwavering focus on customer service and exceptional quality standards, which have remained consistent over the years.

As part of a natural progression for the Novus Holdings Group, in 2019, Novus Print moved into the publishing space through its acquisition of 3S Media and Famous Publishing. In bringing the perfect mix of innovation and experience to the table, the Group believes this evolution and further acquisitions will enhance its insights into customer needs as the publishing and printing industries continue to transform.
